LHI. Quality for your success.

The establishment of LHI Leasing GmbH in 1973 laid the foundation for LHI Group. Today, we belong to the most successful German investment management and structured finance companies. Since our founding, not one single year concluded with a loss.

We offer tailor-made investment and loan arrangements so that our clients and investors can reach their company and investment goals. Our vast experience makes us your reliable partner for conception, asset management, fund management and administration.

“MORE
THAN
YOU
EXPECT.”

Transparent values, strong performance.

Quality as the basis for our success

With everything we do, we have a clear credo: Always expect top quality from us. How do we achieve top quality? Through consistency, performance and fairness.

Stability through consequence

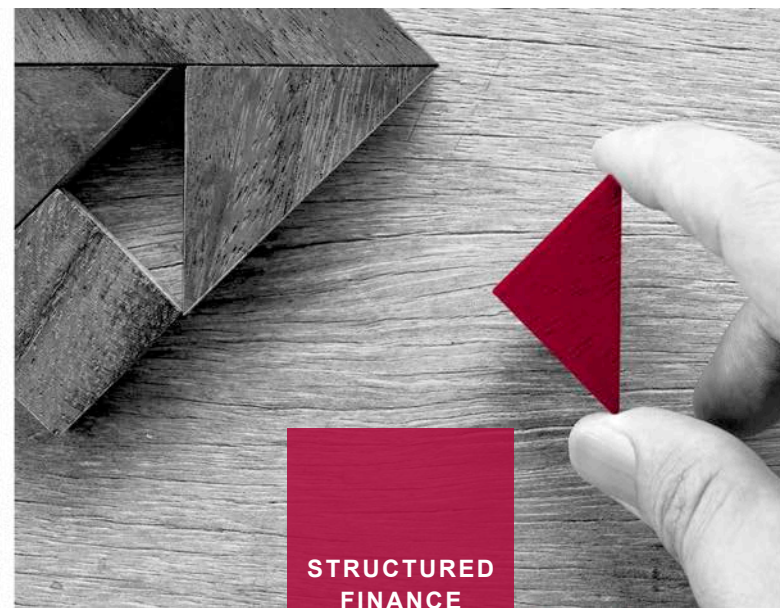

Those who focus on quality are acting in a forward-looking and long-term manner. This applies to the development of projects as well as to the cooperation with you. We intensely focus on issues, that's why we handle complex projects very well. We deal with complex issues until we find ideal solutions for all parties involved.

Success through performance

Of course, our goal is to provide the best possible service for our clients. That is why it is not enough for us to keep our promises and develop solutions that will satisfy all sides. Our mission is always to offer more than you expect. Profound expertise and an eye for change are essential to success in asset management. It is important to be flexible and adaptable enough to modify solutions in such a way that they are also optimal for changing conditions.

Partnership through fairness

Quality holds a value for us that also refers to our cooperation with you. We are on equal terms with our clients and business partners – the best prerequisite for a trustworthy cooperation. For us the best investment continues to be in your trust, that is why we only offer products and services that we would buy or use ourselves.

**STRUCTURED
FINANCE**

**INVESTMENT
MANAGEMENT**

Strategic solutions, sustainable successes.

Expertise for individualized investment strategies

In the asset categories real estate, renewables/infrastructure and aviation, we offer professional, semi-professional and private investors investment products that are perfectly geared towards their portfolio strategy. Our products for private investors are regulated according to the KAGB (German Capital Investment Law) and therefore comply with all of the required guidelines from lawmakers. For institutional investors, we create interesting entryways in line with supervisory requirements and offer them investments that meet the corresponding regulatory requirements. As an experienced partner, we manage the financial assets entrusted to us carefully, reliably and with sound judgement so that you profit from a successful and sustainable development of your investment value.

Mobility for companies

If a company wants to remain successful in the future, above all, it needs one thing – financial room to manoeuvre. Our tailor-made, structured loans offer you exactly that. Together with you, we think about which solution is the best for your company. And since we have plenty of in-house experts and a broad network, you don't only profit from our structuring experience. Our real estate management team for example also works for you like a construction division of your own company for the needed period of time. Being one of the largest portfolio managers in Germany, with us, your real estate is in the best of hands.
